Game Programmer / Backend Developer

ABOUT ME

Game programmer with five years across Unity 3D and Roblox, plus backend and API integration. I build gameplay systems and the live-service side around them: progression, economy and monetization.

EXPERIENCE

AULEEK – DHAKA, BANGLADESH.
GAME DEVELOPER
JANUARY 2026 - PRESENT

- Build gameplay and backend systems for two shipped Roblox titles, Clean-a-Crime and Robbery Simulator.
- Own systems end to end: core mechanics, objectives, lobby, progression and monetization.
- On Robbery Simulator, designed the NPC and police AI, the Heat escalation system and a custom navigation stack replacing the engine's pathfinding.
- Currently building Highway Wrecker, a Unity 6 mobile title for release under Auleek.

FREELANCE
GAME PROGRAMMER
DECEMBER 2021 - MAY 2023, APRIL 2024 - DECEMBER 2025

- Completed 15+ client projects with consistently positive feedback.
- Delivered Unity work across Android, iOS and WebGL, including backend and API integration.

GAMESOC STUDIOS – CYPRUS.
UNITY GAME DEVELOPER (REMOTE)
JUNE 2023 – MARCH 2024

- Built virtual-currency payouts for thousands of users, then added Binance withdrawals for players with no access to Coinbase; 70% moved to it.
- Integrated PlayFab accounts and economy, plus ad monetization and anti-exploit checks.

EDUCATION

BSC / MULTIMEDIA UNIVERSITY (2016-2021)

Bachelor of Computer Science, Game Development.

HSC / DIGHAPATIA M.K COLLEGE, NATORE (2009-2011)

Higher School Certificate program.

SKILLS

- Unity 3D
- Photon Networking
- Smart Contracts
